AMBLIT Navigator

The Intelligent Semantic Browser

Version **2.5**

Navigating the Internet Just Got Easier

Next Generation Internet Browser

Amblit Navigator is the next generation information and Internet browser with an intelligent semantic agent and an integrated content manager. Through its simple, robust interface, you get information faster, easier and more securely without needing to know where it is. You get this information without the time-consuming web page downloads and annoying pop-up ads. Navigator understands English sentence input and is one of the most robust information retrievers available today.

Intelligent Personal Agent

Amblit Navigator includes a personal assistant or agent, which you can both command and teach what you want and when you want it. You do not need to remember where things are, or how to access them. Simply ask, and your agent will work with the appropriate services and service providers to complete your request.

Click, Speak, Type

Amblit Navigator understands spoken and written English, recognizing thousands of sentences. Or, point and click to get simple guidance for your complex requests. Amblit Navigator's responses are displayed or spoken, and can optionally be saved to your PDA for later reference. Amblit Navigator works with your existing programs, documents and computer files.

Information & Content Management

Amblit Navigator has a simple, but powerful information and content management system. You can drag and drop information into the content management window and automatically create and hierarchically store information notes, personal agent requests and commands, file and program shortcuts, and bookmarks to your favorite web pages. Simply clicking on an entry will either start your favorite program, open a series of personal notes, prepare your current Excel spreadsheet, initiate an agent request or open those hard to find web pages.

Your Benefits

Through one integrated window, Amblit Navigator will:

- Save time getting a wealth of information from trusted sources fast.

- Save money accessing news, dictionaries, encyclopedias, calculators, language translators, company and investment guides, and much more without subscribing or buying them.

- Reduce the stress of gathering, organizing, and finding information.

See how simple...

Ask your personal assistant:

Please get the weather
 A five day forecast for you home area, or a city you specify
